

Raymond Recorder

Volume 32

THURSDAY, JUNE 8th, 1933.

Number 14.

Raymond Council Meeting Is Held

All members of the Council were present at the meeting. For several years the Town has looked after the son of Eric Organ having paid \$15. per month for him since 1921. Solicitor Ostlund was instructed to take action to recover from Mr. Organ the amount he agreed to pay for the boys keep unless arrangements were made to make settlement.

A letter from Solicitor Ostlund was read showing that the Town is not liable for Hospital accounts unless a written order is given the Hospital asking their admittance.

A protest of Knight Sugar Co. and Ray Knight was read as to closing Street between Blocks 182 and 183—Plan 4489 J, and offering to buy if closed. A price was named for the lot if Knight Sugar Co. would buy the amount appraised of \$50.00.

A Resolution to Consolidate Taxes was passed by the Council.

Report of Police and Engineer read and approved.

A long list of Water Arrears was considered and after being carefully gone over, a few cases where water had been cut off for a period and not used, were cancelled, but some \$2500.00 was charged against the property as taxes by a resolution of the Council in accordance with the Town Water By-law.

The following letter of Resignation of the Librarian was read and official acceptance passed.

Raymond, May 12th, 1933.
To Mayor and Council:

I hereby tender my resignation as Librarian. I let the Librarian know of this one month ago, so probably arrangements have been made for a new one to take my place right away.

Thanking you for the consideration you have given this matter.

I am respectfully,
Mrs. M. W. Boyson.

The appointment of Mrs. Melva Ross as Librarian was ratified.

The pay roll covering \$204.00 dollars for ditch work: Widows allowances, salaries etc. was passed and ordered paid.

News Notes

"KING KONG" Tonite and all week.

Saturday was a bank holiday and bank clerks spent the week-end in various points of the district.

The Factory crew had a holiday on Saturday all day, but the construction crew on the outside worked all day.

Mr. and Mrs. S. J. May were Magrath visitors Friday, Mrs. May spending the afternoon with an old acquaintance.

Saturday was a perfect day for vacationing and quite a number spent the day in motoring and picnicking.

Windows were smashed in Winnipeg in a hail storm in the late evening that followed a day of stifling heat. In Findlay, Man., gardens were damaged, all exposed windows smashed, and crops of winter rye ruined in a hail storm two miles wide that lasted twenty minutes. Stones as big as hen's eggs were noticed during and after the storm.

CAR REFLECTOR LAW IN EFFECT

MOTORISTS IN COUNTRY ARE AFFECTED BY NEW LEGISLATION

With Alberta's new car reflector law taking effect Thursday, June 1 city motorists are puzzled over what should be done to comply with the regulations.

Under the act passed at the last session of the legislature motor vehicles whether standing or in motion on main or secondary highways must display front and rear lights at night.

The act also provides, however, that instead of having the front and rear lights on when the car is parked, a rear reflector of approved type may be used.

For City Drivers

As the act does not apply to city streets, motorists in Lethbridge who do not travel outside the boundaries of this city are not affected.

But the great majority of car drivers here do drive through the country, using both main and secondary highways. And that's where the new act gets to work.

Should he park somewhere on a country road, the city motorist must have his lights on at front and rear to comply with the act. Or if he does not want to burn his lights, he must have a reflector on the rear of his machine.

If he does not show front and rear lights or does does not display a reflector, then he will be liable to be fined under the act.

Approved Type

The approved type of reflector is as follows: A circular lens of not less than three inches in diameter, backed by a reflecting material mounted in a substantial case sufficient to protect the reflecting material from moisture or dust and so constructed that under normal atmospheric conditions at night, it will give a red reflection to the light from headlights of a motor vehicle within a distance of at least 200 feet if either of those lights is within two degrees of a line projected at right angles to the plane of the reflector and from the centre thereof.—Leth. Herald.

T. Geo. Wood was in Lethbridge and Hill Spring on Wednesday.

A dry and disagreeable wind was blowing on Tuesday and Wednesday.

Mr. and Mrs. Wit Hague and party were Lethbridge visitors on Saturday.

Mr. and Mrs. Ross Humphreys were in Lethbridge Saturday last week.

Lowell Court was a Lethbridge visitor last Thursday afternoon.

Howard Oliver of Calgary spent the holiday and week-end in Raymond.

Mr. and Mrs. Roy Anderson and family of Berthwell spent the week-end in Raymond with friends and relatives.

Work started this week on the Second Ward Darning Pavilion and if possible this will be finished for Dominion Day. A good pile of cinders are on the ground now as a bed and drainage for the cement.

Funeral Services Mrs. Clara Olsen

Funeral services over the remains of Mrs. Theo. Olsen were held in the Stake House, A. D. Woolley, who had Raymond, Sunday June 4, at 2 p.m., with Bishop Heber F. Allen of the Raymond 1st Ward in charge. A good crowd was present to pay their respects to the memory of the deceased, and a profusion of beautiful flowers decked the casket and rostrum. The hall was draped in white, and the casket a rich pearl grey.

Ira McBride led the singing with Mrs. R. W. Tollestrup at the Organ, and the hymns were: "When Dark and Dread the Skies Appear," "The Deepening Trials" and "Shall We Meet Beyond the River." Mrs. D. A. Watson sang "Come Unto Me" and Thos. K. Roberts sang "Ora Pro Nobis" as special musical numbers.

Bishop Allen in a few opening remarks stated his appreciation of the labors of the deceased in the Primary organization, up to the time that her health demanded her ceasing this activity two or three years ago.

He spoke of the atmosphere of the home, and the splendid capabilities that Melva had shown in taking care of the house and looking after the other children in her mother's illness. On behalf of the husband and family he thanked all for their help and assistance in this time of sorrow and sadness.

Elder Melvin T. King was the next speaker, and paid a high tribute to the energy and capability of two of the children Melva and Bruce, whom he had taught in the school room. He stated that such respect and application to duty as the children exhibited, was a splendid tribute to the influence and training of the home.

He mourned with the family in the loss of wife and mother, but felt that where there was such a tremendous loss, someone must truly be gaining. Six of the Dahl boys, Rulon Karl, Frelin Clifford, Paul and Lloyd acted as pall bearers, and girl friends of the deceased in her Sunday School class were the flower bearers.

News Notes

"KING KONG" never another picture like it.

Big signs were posted on billboards in Southern Alberta last week and this advertising Raymond's big Stampede and Race Meet for Dominion Day.

O. H. Snow left Tuesday afternoon to attend the Convention of Municipalities to be held in Edmonton this week, and will return Saturday or Sunday. During his absence Miss Mac Snow is in charge of the Town Office.

Mr. and Mrs. Joe Elder and children spent the week-end with relatives and friends in Barnwell returning home Monday.

In an effort to aid dairying, the Wisconsin Senate passed a bill requiring all hotels and restaurants in the State to serve two thirds of an ounce of butter and a helping of cheese to each customer they serve.

Alvin Pole, 13 years, of Claresholm, died Saturday as the result of falling through a trap door into the cellar of his uncle's home, and sustaining internal abdominal and chest injuries. He made good headway in the hospital until he contracted pneumonia, which was too much for his injured body.

greatly, and hoped that some day we would understand it all.

A. D. Woolley, who had lived neighbors to the family for a long while was the next speaker. He stated that there were many things, which by the phrases of nature we could explain, and that through learning our ability to understand continually became greater. But said he, death had never been explained. We cannot understand why a young mother, such as this should be called away from her family, at a time when according to our judgment, she was needed badly, and yet, there must be a reason and a good one, and we must wait in faith for the answer. He felt that it was our duty and privilege now, to assist the father and children bridge over the loss of wife and mother; and help them to adjust themselves to the new order which would now be necessary because of this break in the circle.

John H. Green of Lethbridge was the concluding speaker and referred to the Crucifixion and death of Christ, the sorrow connected therewith, and other incidents surrounding it. While we could do nothing to help the deceased, we could do all we can to help the husband and children who are left behind. He had been acquainted with the family for ten or twelve years, and had never known a more faithful and devoted mother and wife.

J. Ross Salmon offered the invocation, Rhonda Dahl pronounced the benediction, and testimony was in the local cemetery with Christensen Bros in charge.

Six of the Dahl boys, Rulon Karl, Frelin Clifford, Paul and Lloyd acted as pall bearers, and girl friends of the deceased in her Sunday School class were the flower bearers.

Mightiest of all spectacles "KING KONG" Tonite and all week.

The road between here and Welling is much improved now following the work last week, and a scarifying and grading following a rain now would make it very good.

Because of the rush on car reflectors to comply with the law, the police are allowing a little leeway for motorists to get them and get them attached.

Sugar has advanced another 20 cents in the Province, and it is stated more advances are likely.

When James Herbert Rieberg four years old, accidentally fell off the lift in an elevator at Trochu, Alberta, and fell fifty feet down the shaft, he was almost instantly killed.

Falling from her third-story home, a 23 months old baby in Chicago was rushed to the hospital, where doctors examined her and stated there was nothing the matter with her.

James Mattern, American, made very good time on his world hop from New York to Omak, Siberia, where he rested over Wednesday, before continuing his flight. Forecasts stated the worst part of his flight was over, with indications of good weather.

Stampede Committee Meeting Held

Normal Students Successful

Misses Wyora Scoville and Beth Walker are home from their Normal Training Course both glad to be home, and of course delighted at having been successful in their work.

Reports show a good average in all subjects for the year, the two Raymond girls being very equal in their work. Beth had a splendid record in Physical Training, standing second in the school, and because of Miss Hegenburg of Woolford being unable to attend Summer School, Beth was awarded this opportunity.

We congratulate the girls on their success in the school and sincerely hope they will locate a school in the district for the coming term.

Piano Recital

The pupils of Miss Marie B. Lovering A.T.C.M. are holding a piano recital in Lethbridge at the Marquis Hotel on Friday evening, June 9th. The following students from Raymond are taking part on the programme: Mildred, Hazel, and Margaret McBride, Darline Douglas, La-Mont Palmer, Louise Burnett, Steele Brewerton, Shirley Taylor, Lillian and Agnes Roberts, Jolayne Price, Alice Snow, Carl Alfred, Duane Wiggell, Willis Taylor, June May.

A number of parents and friends are also expected to be among those present.

Rev. Spence Here

Rev. Ben H. Spence of Toronto, addressed a meeting here Monday night in the interests of prohibition, and gave a very interesting and illuminating talk.

He had a great number of statistics of earnings of Governments on hard liquor taxes, earnings of manufacturing concerns on the sale and traffic and made a strong plea for a return to prohibition, and the stamping out of the drink evil. There was a fair crowd present, and the speaker held their attention throughout the evening.

Golf Gossip

Three records were set up on the local Golf Course over the week end which are worthy of mention, as follows:—

Reed Kirkham made a drive of 322 yards.

Renaun Pack made an eagle on hole Number 9. Par for this hole is 5, Renaun making it in 3 shots.

Gordon Ratten shot a 38 for the nine holes, par for the course being 34.

Frank Ratten will give a new golf ball to anyone beating these records, who else will donate a prize.

Records must be attested by a disinterested party before any prize will be awarded.

The Hill Spring High School and the local High baseball teams had a friendly game last Saturday night, which was won by the Hill Spring boys.

Elders Weldon Bascom and Gerald Gibb, recently returned missionaries, will be the speakers at the Raymond Second Ward Sacrament meeting on Sunday evening next. A good musical program is also arranged.

Checking up on details and arranging the many items that go toward a successful Stampede, the Committee in charge of the Stampede and Races met in the Knight Sugar Co. office Monday night and heard reports of several of the Committees and passed on a number of important items relative to the show.

That there will be a loud speaking device for announcing events and results is fairly certain from all indications. Nothing definite has been decided yet, but it is expected that arrangements will be completed whereby this will be taken care of. There will also be a siren or horn of some kind to signal riders and ropers when their time is up, instead of the small whistle used heretofore.

To speed up the riding, in collaboration with several other Committees and individuals in the south country, five association saddles will be purchased, and one by each interested party, and these five saddles will be used for the five Stampedes in the interested points, and then stored at a central place until the next season. Hereafter there has been considerable waiting for saddles, the rigs have not been uniform and there has been some dissatisfaction because riders claimed other boys had the advantage in a better saddle. All this will be done away with when association saddles are used, five of which will be identical.

The grounds will be fixed up and the fence on the east will be rebuilt and crowned with barbed wire, 8, fellers, if you go over the fence better have your pants tin lined before you start, or it may be too bad for you.

Mr. and Mrs. B. F. Tanner and Miss Ila Franks all of Cardston, were Raymond visitors on Tuesday last.

P. Drew Clarke, Barrister of Lethbridge, was a Raymond visitor on Tuesday.

Mr. and Mrs. C. R. Wing are in Utah, attending the M. I. A. Convention and visiting with relatives and friends.

Mr. and Mrs. J. H. Reid were Raymond visitors Tuesday, Mrs. Reid spending the day with Mr. and Mrs. S. J. May and family, while Mr. Reid went on to Manyberries and points east.

Baseball Chatter

Our Baseball column was too late for this week and we will have a double header next week. Cliff Nalder's team the "Brownies" are leading the parade now.

June 9—Brownies and Pats.
June 12—Rustlers & Brownie
June 13—Pats and Capitols.
June 14—Rustlers and Pats.
June 16—Brownies and Caps.
June 19 Rustlers and Caps.
June 20—Brownies and Pats.
June 21—Rustlers & Brownies
June 23—Pats and Capitols.
June 26—Rustlers and Pats.
June 27—Brownies and Caps.
June 28—Rustlers and Caps.
June 30—Brownies and Pats.

Keep this schedule for reference. Come and see the games, and watch this column for the latest dope on the progress and standing of the teams.

RULES OF THE ROAD

A new law affecting motorists, came into effect on June 1st, and vitally affects every car driver in Raymond, as according to the interpretation of the law, one will now be liable to a fine if he leaves his car on a street any place in the town without lights on, or a reflector on the rear of the machine. It is a good law, and will no doubt reduce the number of accidents considerably, as many in the past year have been the direct result of cars and trucks being left on streets and highways without lights or reflectors, and have been crashed into by approaching vehicles with very often fatal results. If you have not a reflector on your car or truck, it may be money well spent to obtain one and see it is ready for emergency.

In the enforcement of this law, like all others, it will require the co-operation of all motorists if successful, and to our shame, it must be said, that except in cases where we are directly concerned, either because of damage or danger we wink at the lawbreaker, and would not think of reporting his number. Why have laws on our statutes and then all work together in seeing that they are abused and ignored. We could do a lot to help reduce motor fatalities if we took seriously the honoring, obeying and sustaining the law.

There are nearly as many cars and trucks on the road at night with only one light as there are with two. This is definitely against the law, and sooner or later a crash will result, and then we will say, "Well, I knew he only had one light and it was bound to happen." Nice sentiments, but useless after a crash has occurred. There is not one motorist in a hundred who ever dims a light when passing another car. Most of our lights are glaring and dazzle an approaching driver. How easy to dim for a few seconds until another car passes, and how much safer to do this than to buzz along at full speed, which usually means that the fast moving car takes his share of the road in the middle, or very nearly there.

Ignoring the rights of others in passing on the highways endangers life frequently and could be avoided if we practiced a little consideration. Every one despises the driver who ignores these and other rules of the road, and yet we condone him, add to the list of motor fatalities constantly, forget about danger, the inconvenience and the trouble we cause and go blithely on our way.

As a citizen, our part is not done in obeying these laws, but we should help our neighbor keep them even if we have to remind him of it.

GASTRONOMIC CYCLES

Habits of eating may have as much as anything to do with the difference between the medieval and modern man. At least one scientist, whose specialty is food and its relation to man, believes it has more to do with it than most other factors.

He draws a convincing comparison between the medieval

man and his common ailments and the modern man and his principal diseases in an attempt to prove that man is what he is because of what and how much he eats.

The most characteristic diseases of the past seem to have had a definite relation to insufficient and improper food which for centuries were the common lot of man. Hunger and starvation were not strangers even in the Western world up to the late nineteenth century, because food was scarce and costly.

Today food is abundant and cheap. The average family has more to eat and spends a smaller fraction of its income for food than ever before. With what effect upon public health? The modern man is eating himself into a number of diseases of which his undernourished ancestors never heard. Obesity, diabetes and vascular diseases are related to gastronomic indiscretions.

Manifestly, man must either starve to death or eat himself to death, and if he doesn't fill up when the food is before him the farmer won't eat.

JUNE

June! And what a pity it can't have sixty instead of only thirty days. One might say Lowell in his Sir Launfal, "Oh, what is so rare as a day in June," and then add to it the wisecrack, "why, two days, of course," and not be far amiss, for June, even when it snows, is charming.

June, the month of brides, is also the month of graduates, but the graduates' joy in June this year may be tinged with the thought that he is going out into a world much colder than the thermometer at this season would seem to indicate.

June, also, is the month of roses, but is the month of iris and of peonies too, and the rose has to do valiant battle to hold its own with these two sisters of showy garb and flaunting airs. Nevertheless the rose remains the favorite of all the June flowers, as lovely when its petals come to fullest bloom and fall as when in the bud. George Elliot voiced popular thought in language as beautiful as the rose itself when she wrote:

You love roses—so do I, I wish.

The sky would rain down roses, as they rain from off the shaken bush.

Why will it not?

Then all the valleys would be pink and white and soft to tread on. They would fall as light

As feather, smelling sweet; and it would be

Like sleeping and yet waking, all at once.

June, month of brides, roses and graduates—month, too, of the hay harvest moon, of the odors of new mown hay, of plans for vacation; month of the "Good old summertime," of long evenings and pleasant memories; a rare month, a wonderful month, so much to be enjoyed, and only 30 days in which to do it.

Water was turned into the town ditches last week, and some irrigating done toward the end of the week.

THE PRICE OF A NEWS- PAPER

(Toronto Globe)

A valued subscriber to the Globe has raised a point, which perhaps is in the minds of many people when he asked why the price of newspapers remains the same as before the general drop in price levels.

Few readers realize that the small amount asked for a copy of a daily paper bears no relation to the cost of producing it. It is merely a nominal sum, which in the case of a paper like the Globe, does not pay for the cost of the white paper used. It is unnecessary to refer to the cost of handling, delivery and postage, or to the fact that it carries news costing thousands of dollars to collect.

The Simco Reformer recently illustrated the difficulties under which newspapers in general are operating by recalling weeklies which have ceased publication and others which have reduced their size. "Such instances as these," it comments, "should go far toward dispelling the impression that newspapers suffer less from the depression than the average business. As the Bowmanville Statesman remarks, this false impression may be due to the high standards being maintained by the newspapers to create that optimistic spirit so characteristic of editors. The fact is that the publishing business is among the hardest hit."

Despite the fall in prices all around, the newspaper is still the cheapest thing on the market.—Red Deer Advocate.

News Notes

Never again another "King Kong."

Mr. and Mrs. S. I. May were in Lethbridge last Saturday.

E. L. Hodson was in Raymond this week spending part of his holidays.

S. B. Card and Wm. Reber were Magrath visitors on Friday last.

The M. I. A. had charge of the Sunday evening meeting in the Raymond Second Ward and a very enjoyable program was rendered. Elder Melvin T. King gave a splendid talk on the Resurrection, and a number of very enjoyable musical selections completed the program.

Frank Rutten has given us attendance figures for the first month at the Golf Course, showing 557 players from May 7th to June 7th. This is very gratifying to the Club and speaks well for the course and for the care taking of "Frank."

GROWTH

"Great oaks from little acorns grow." The human body develops from one minute cell. It seems almost incredible that our complex bodies with their highly specialized tissues and organs all have their beginning in the same single cell, the simplest form of life.

The one cell, which is the beginning of life, grows and multiplies until it has produced the millions of cells which make up the human body. We do not know what causes the cell to multiply, this factor is the spark of life itself.

As all parts of the body have their common origin in one cell, so do they remain interdependent through life. A healthy body is healthy in all its parts. Disease in any one part affects the whole structure.

Food and oxygen are required by all body cells. Without food and oxygen, the cells soon perish while a lack of these substances results in faulty growth.

The food we take into our mouths must be altered before

it can be used. This change begins in the mouth where the food is mixed with saliva, and the process of digestion starts with certain changes in the starchy foods. The presence of food in the mouth calls for a flow of saliva. Because of past associations, the sight or smell of food has the same effect and it is a fact that our mouths actually water at the sight or smell of food.

The saliva not only acts as a digestive fluid but it also dissolves the food and so makes it easier to swallow. In addition, the saliva keeps the mouth clean and lubricates the parts. A dry mouth is uncomfortable and interferes with speech.

Passing down the gullet the food reaches the stomach. The stomach also waters at the sight and smell of food, and as a result of the taste of food in the mouth, gastric juice is therefore ready in the stomach to continue the process of digestion. The gastric juice is the only body fluid which is acid. The cells lining the stomach are capable of resisting the effects of this acid fluid. The normal stomach is acid or sour.

The flow of gastric juice is interfered with by emotional upsets. This is one reason why unpleasant or irritating subjects should not be mentioned at meal-time. There is some truth in the saying — "Laugh and grow fat." Pleasant conditions at meal-time do promote good digestion.

From the stomach, the food passes to the intestines where digestion is completed, and the food absorbed and carried in the blood stream all over the body to nourish every cell in the body.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

ALBERTA NEWS BULLETIN

Issued by the Publicity Commissioner, Government Buildings, Edmonton, June 5, 1933

OIL PRODUCTION

Production of oil in Alberta for April has just been announced by the petroleum division of the lands and mines department as 74,645 barrels, of which 69,447 was naptha from Turner Valley.

DEBT ADJUSTMENT ACT IN FORCE

The new debt adjustment act of the province, passed at last session, came into force on June 1. The announcement was made by W. Lorce, chairman of the new debt adjustment board just set up.

SUMMER SCHOOL AGAIN

The University and Department of Education have decided again to hold the usual summer session for teachers at the University. The school opens July 3rd. Last year the attendance reached almost to the thousand mark. This year the school will include two courses in supervision, the first having been held last year with 50 registered.

A FEATHER FOR LETHBRIDGE

According to a recent survey by the Canadian Council on Child Welfare, the city of Lethbridge, Alberta, leads Canada in high percentage of school attendance, among 79 centres surveyed. The city's non-attendance record is 2.2 per cent, and other Alberta cities are very close behind.

TROUT FOR COLD LAKE

As announced recently, Cold Lake, on the north-eastern boundary of the province, is to be stocked with speckled trout this spring, and this week 86,220 fry from the hatcheries at Banff were shipped, and were liberated on Tuesday, under the direction of the Superintendent of the Banff hatchery, J. E. Martin. The undertaking is a joint effort of the federal fisheries department and the provincial fisheries division of the Lands and Mines Department under direction of R. T. Rodd.

The introduction of this trout into Cold Lake will not make any change necessary in the fishing season in that lake, as the trout spawn to the same season as the lake trout.

MOUNTED POLICE ANNIVERSARY

The Royal Canadian Mounted Police, formerly the Royal North West Mounted, celebrated its diamond jubilee in May, the force being established just 60 years ago. The first post in Alberta was established in 1874 on the site of the present town of Macleod.

UNIFORM GAME LAWS

More uniform game laws and game fees or the prairie provinces were urged at a conference of game officials of the three governments at Edmonton last week.

ALBERTA'S IMPROVED HOG RECORD

The steady improvement in the quality of Alberta hogs is strongly indicated in a survey recently completed by Provincial Agricultural Officials. The record shows that in 1930-32, 935 hogs were marketed from this province, of which 6.13 per cent. reached the top grade as "selects" 1932 the marketings totalled 723,352 of which 7.22 were "selects". In 1932 the marketings reached 1,008,452 head, of which 8.36 per cent were selects. This shows a steady improvement in quality, but the more significant fact is that of the increased number of hogs marketed, a very large percentage fell with in the higher grades. In two years the increase in marketings has been 379,517 of which 49,980 head were 'selects'. The increase in the number of selects in 1932 as compared with 1930 is 123 per cent. In 1932 there were 187,837 more bacon hogs marketed from the province than in 1930, an increase of 142 per cent. Over sixty per cent. of the increase of 379,517 hogs marketed in 1932 over 1930, were graded 'bacons' or 'selects'. The volume of selects has increased in volume from 32,269 in 1930 to 63,858 in 1932. The percentage of "butchers" or the lowest grade hogs has decreased from 58 p.c. in 1930 to 45.6 p.c. in 1932.

"Good Bye Uncle Jock"

Said Vera Fleck, (left) and Lytte Teppaz, as they shook hands with Captain R. G. Latta, and left the Canadian Pacific liner Empress of Britain at Father Point, Quebec, to make an aeroplane dash to Montreal on their way to Chicago where they are contestants in the selection of a "Queen" of the Century of Progress Exposition. No matter what the contest results Vera and Lytte will carry memories of a thrilling first voyage home with them. The Empress of Britain, one of the world's fastest liners, broke two records for them, and a combination of fast ship, fast plane and fast train gave the two pretty girls the distinction of making the fastest voyages from London and Paris to Chicago ever recorded. They travelled so fast all the way that Miss Teppaz, who lunched in Paris, Friday, May 18, found herself breakfasting less than six days later in Chicago, May 25. Miss Fleck's record was from breakfast to breakfast. Canadian Pacific officials arranged every detail of their entire journey which, with the exception of two hours and fifty minutes in the air, used the facilities of that organization.

HEALTH**TUBERCULOSIS IN YOUNG WOMEN**

Unlike the women of past generations, women today do not allow themselves to grow old. There is much to be commended in the manner in which the present-day woman remains young in spirit, in her actions and in her dress. Most women are, therefore, young women, but in this article we will consider only those who are young in years.

Throughout life there are certain age periods during which susceptibility to various diseases is greatest. Thus it happens that diseases which are peculiar to the first ten years of life are not, as a general rule, common in the later decades. The probability of an aged person's dying of measles or of a young infant's succumbing to hardening of the arteries is exceedingly remote.

Although tuberculosis finds its victims in every age group from infancy to the close of life, nevertheless it exacts its greatest toll at certain ages. For

females, this period is between the ages of fifteen and twenty-six. At this time, when ambition is the ascendant and hopes are high, the young woman is particularly apt to fall a victim to this serious yet preventable disease.

What are the factors responsible for the causes that underlie a death rate which is much higher than that of young men of a similar age?

In the first place, the physiological changes which accompany adolescence in women is a factor of major importance. School work and the ever-increasing social activities arising therefrom also cloud the picture. Later, work in factory, office or shop to which the individual is unaccustomed also plays a contributory role. Evening does not always bring its quota of rest, or night its full allotment of sleep which refreshes. Too often indeed, each new day is begun with a handicap of fatigue carried over from the previous day. Such an individual usually remains in bed breakfast is either taken in a rush or is entirely forgotten. Nothing is more conducive to a loss of morning appetite than is insufficient sleep. So much time is spent in "keeping going" in one way or another that there is neglect of the simple rules of healthy living.

Loss of weight, a tired feel

News Notes

*For Sale - 40 Chickens. See Walter Rouse or Phone 77.

"KING KONG" Tonite and all week.

WANTED TO RENT—Type-writer portable type preferred. See Allan Weaver.

WANTED—A good soaking rain. Reward, the appreciation of farmers and gardeners.

LOST — Combination grey mottled Shaffer Pen and Pencil. Return to Raymond Pharmacy Please.

RENEW YOUR RECORDER

The Second Ward Party on the 16th will be a musical program in charge of Louis King. It will be good, so reserve the date.

Our Want Ads. never go unanswered. If you have anything to sell, trade, or want to buy anything, use a Want Ad. and see how quick it works.

Elder Gerald Gibb was the speaker at the First Ward Council meeting Sunday evening and gave a very interesting talk on "Customs and Habits of the Maori People from an Educational Standpoint". His personal knowledge of the subject and the humor injected into it made the topic very interesting.

FAMILY SETTLEMENT

Unemployed families to the number of about 110 have been settled on land of their own this spring in the province, through the efforts of the land settlement committee of the province. Most of these have come from Calgary and Edmonton.

ing and a degree of pallor, soon become evident as a result of the struggle to maintain a balance between work and play, sleep and activity. Soon a vicious cycle is established, resistance is definitely lowered and a breakdown is in the offing for on such a soil the germs of tuberculosis flourish best.

To such an individual, marriage with the additional strain of child-bearing is definitely contra-indicated pending the advice of the family doctor.

Sickness is not a matter of merely individual concern; the sorrow and expense which are so frequently and often so needlessly incurred are shared by other members of the family.

STOCK MEN WARNED

Serious losses of live stock, as a result of the eating of the poisonous weed known as water hemlock are occurring in the province, according to Dr. Percy Talbot, Provincial Veterinarian, who warns all live stock owners to be on the look out for the weed, which should be destroyed as quickly as possible by grubbing out the roots drying and burning them. The water hemlock is a tall, erect, marsh plant growing from two to six feet high, with stems fairly stout and streaked with purple, bearing a few pale green doubly-compound leaves, and many quite flat clusters of very small, greenish-white flowers. The root consists of a bunch of fleshy, tapering projections attached to the root stocks. This poisonous plant is found in local patches throughout the province in the foothills and on the prairie, always in low, wet, marshy ground. It occurs along creeks, irrigation ditches, edges of sloughs, and lakes and in low meadow land. The most poisonous parts of the plant are the root stock and roots but the stems also contain poison as well as the leaves of young plants. The poison acts quickly and is deadly.

The Broadway Store**SWINE SURVEY**

A more effective system of obtaining information on hog population and hog marketings in the province was agreed upon at a conference this week of representatives of the federal live stock branch, the experimental farms, the Provincial Department of Agriculture, and the University Agricultural College. The University Agricultural College, which has now come to be second only to Ontario in import-

ance in hog production, having marketed in 1932 nearly one-third of Canada's total marketings.

WOMEN'S FARM WEEK

The usual women's Summer farm week will be held this summer at Olds School of Agriculture from July 31 to August 4. The usual meet at Vermilion School will this year be combined with that at Olds.

Summer's around the corner!

ALREADY you are beginning to enjoy the outdoor season. Wouldn't you welcome a crisp breakfast tomorrow?

Well, serve Kellogg's Corn Flakes. The refreshing crispness and flavor of these toasted flakes make appetites take a new lease on life. Good for you too. So rich in energy and easy to digest.

Fine for the children. Order the red-and-green package from your grocer. Made by Kellogg in London, Ontario.
